**CAUTION.** Be careful, when ordering, to order a wheel that is the right size. In order to arrive at the proper size, take inseat measurement from crotch to heels, allow 5 1/2 inches for the length of the crank, 3 inches for the saddle above the frame. Thus a 16-inch frame would answer for a boy or girl having an inseat measurement up to 24 inches. An 18-inch frame, inseat measurement from 24 to 28 inches. For a boy or girl having an inseat measurement greater than 28 inches, we recommend our regular 20-inch Elgin King or Improved Josephine Bicycles, fully described on the preceding pages.
